

## **PREGNANT/MARRIED STUDENTS**

Marital, maternal, or paternal status will not affect the rights and privileges of students to receive a public education nor to take part in any extracurricular activity offered by the school.

Girls who become pregnant and wish to remain in school will be permitted to do so. If, in the opinion of the principal or nurse, there is reason to believe participation in regular or extracurricular school activities may endanger the health of the mother or child, a physician's approval will be required.

The physician will state the degree of attendance and participation in the regular school program that is advisable. If continued attendance or participation is not advised by the physician, the principal is authorized to make special arrangements for the instruction of the student and to provide an educational program designed to meet her special needs.

A student who marries is required to notify the school principal providing the data necessary or changes in the student's records.
